### Project Design Phase-II Data Flow Diagram & User Stories

|               |  |
|---------------|--|
| Date          | 14 October 2022  |
| Team ID       | PNT2022TMID52497   |
| Project Name  | Real-Time Communication System Powered by AI for Specially Abled |
| Maximum Marks | 4 Marks  |

## User Stories

Use the below template to list all the user stories for the product.

| User Type               | Functional Requirement (Epic) | User Story Number | User Story / Task   | Acceptance criteria                              | Priority | Release  |
|-------------------------|-------------------------------|-------------------|---|--|----------|----------|
| Customer (Web user)     | Registration                  | USN-1             | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard              | High     | Sprint-1 |
|                         |                               | USN-2             | As a user, I will receive confirmation email once I have registered for the application                   | I can receive confirmation email & click confirm | High     | Sprint-1 |
|                         |                               | USN-3             | As a user, I can register for the application through Gmail   |  | Medium   | Sprint-2 |
|                         | Login                         | USN-4             | As a user, I can log into the application by entering email & password                                    |  | High     | Sprint-2 |
|                         | Dashboard                     | USN-5             | As a user, display all information on the site.   |  | High     | Sprint-2 |
|                         |                               | USN-6             | As a user, give their details for future use.   |  | Medium   | Sprint-2 |
|                         | Recognition                   | USN-7             | As a user, record a video or image and upload it..  |  | High     | Sprint-3 |
|                         |                               | USN-8             | As a user, view the results of analysis and communicate to others.  |  | High     | Sprint-3 |
|                         |                               |                   |   |  |          |          |
| Customer Care Executive |                               |                   | create bot chat and collect the queries.  |  | low      | Sprint-4 |
|                         |                               |                   | get feedback from customers.  |  | Medium   | Sprint-4 |
|                         |                               |                   |   |  |          |          |
| Administrator           |                               |                   | Check the user information.   |  | High     | Sprint-1 |
|                         |                               |                   | Managing the database   |  | High     | Sprint-2 |
|                         |                               |                   |   |  |          |          |
|                         |                               |                   |   |  |          |          |

| User Type           | Functional Requirement (Epic) | User Story Number | User Story / Task   | Acceptance criteria                              | Priority | Release  |
|---------------------|-------------------------------|-------------------|---|--|----------|----------|
|                     |                               |                   |   |  |          |          |
| Customer (Web user) | User registration             | USN-1             | 1.Registration through email<br>2.Registration through mobile no  | I can access my account / dashboard              | High     | Sprint-1 |
|                     | User confirmation             | USN-2             | 1.Confirmation via email<br>2.Confirmation via otp  | I can receive confirmation email & click confirm | High     | Sprint-1 |
|                     |                               |                   |   |  |          |          |
| Developer           | Data collection               |                   | 1.Collecting data for building our project .<br>2.Creating two folders one for training and the other for testing.  |  |          | Sprint-1 |
|                     | Preprocessing                 |                   | Preprocessing the Dataset   |  | High     | sprint-1 |
|                     | Model building                |                   | 1.Initializing the model<br>2.Adding convolution layers<br>3.adding pooling layers<br>4.Full connection layers which includes hidden layers<br>5.Flatten layer<br>6.Compile the model with layers we added to complete the neural network structure |  | High     | Sprint-2 |
|                     | Test the model                |                   | Test the model by passing an image to get predictions.<br>Make sure that the dimensions,rescaling, target size are correct while testing the model  |  | High     | Sprint-3 |
|                     | Build web Application         |                   | Create a web application for recognition using Flask.   |  | High     | Sprint-3 |
|                     | Deployment on IBMcloud        |                   | Integrating the Model which trains and Web application are deployed on cloud.   |  | High     | Sprint-4 |
|                     |                               |                   |   |  |          |          |
